LIMS
N BEIGE-M

Across mountains and seas, we explore the stories of rocks and life. After tens of millions of years, baptized by wind and rain, we discover more unique art and design from the longer natural time and space.

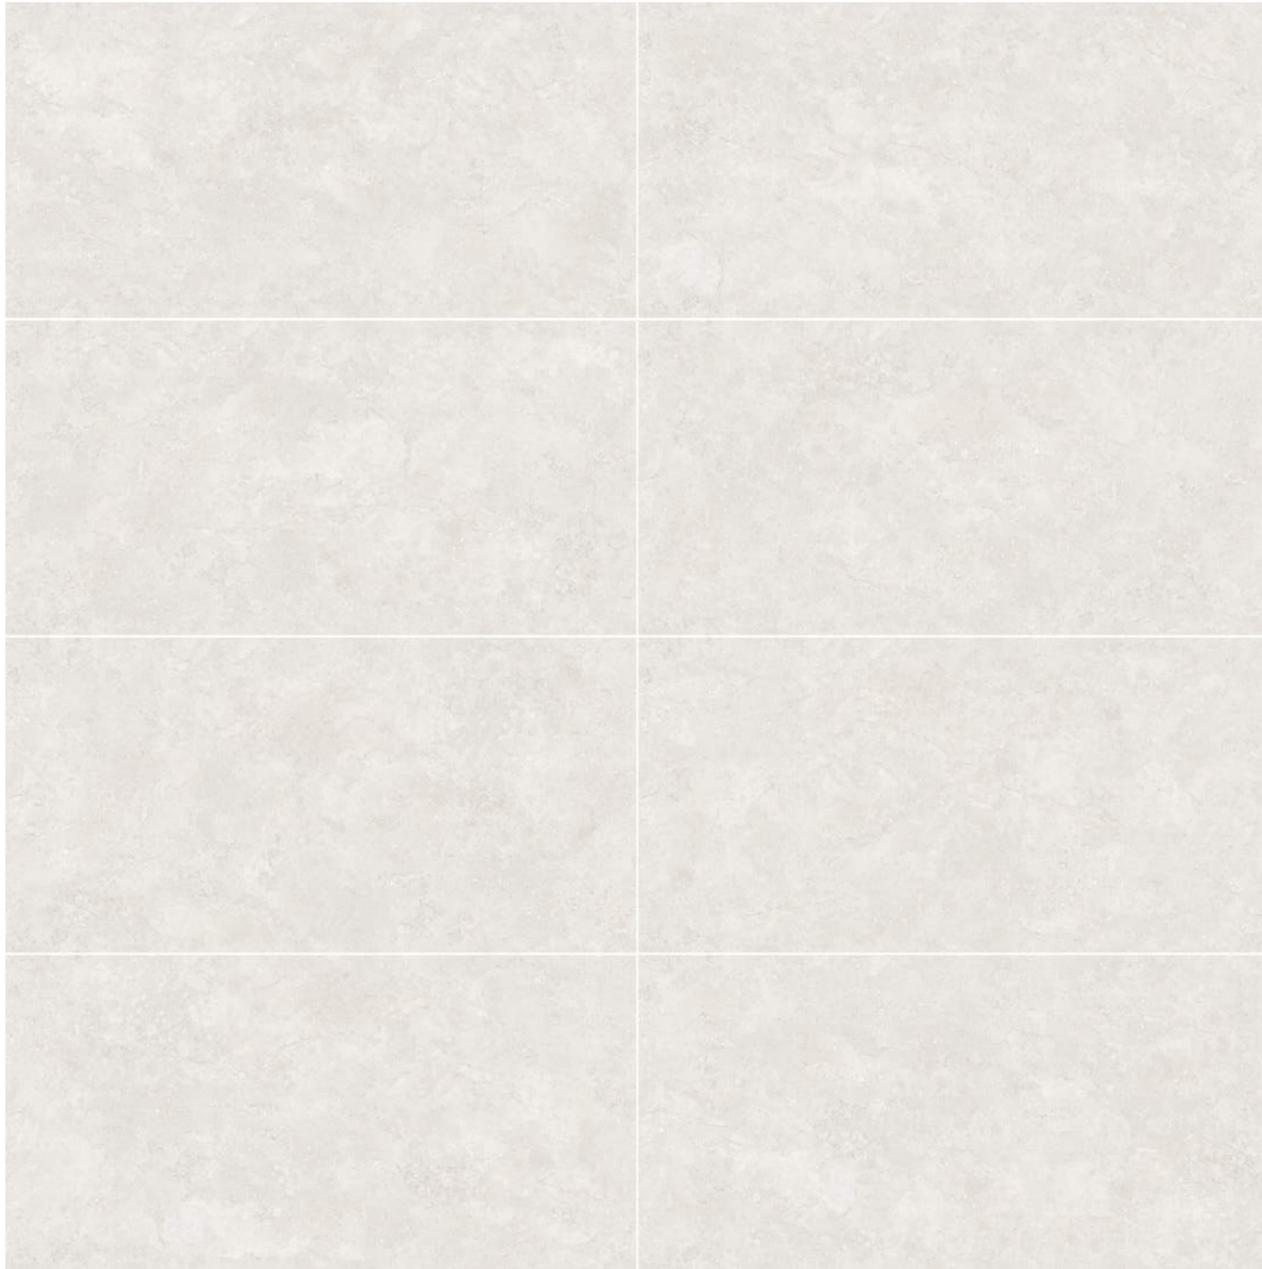

LIMS
N BIANCO-M

The refreshing background color design restores the comfort and tranquility of nature. The light mottled stone patterns are the traces left by the continuous erosion of time on the stone.

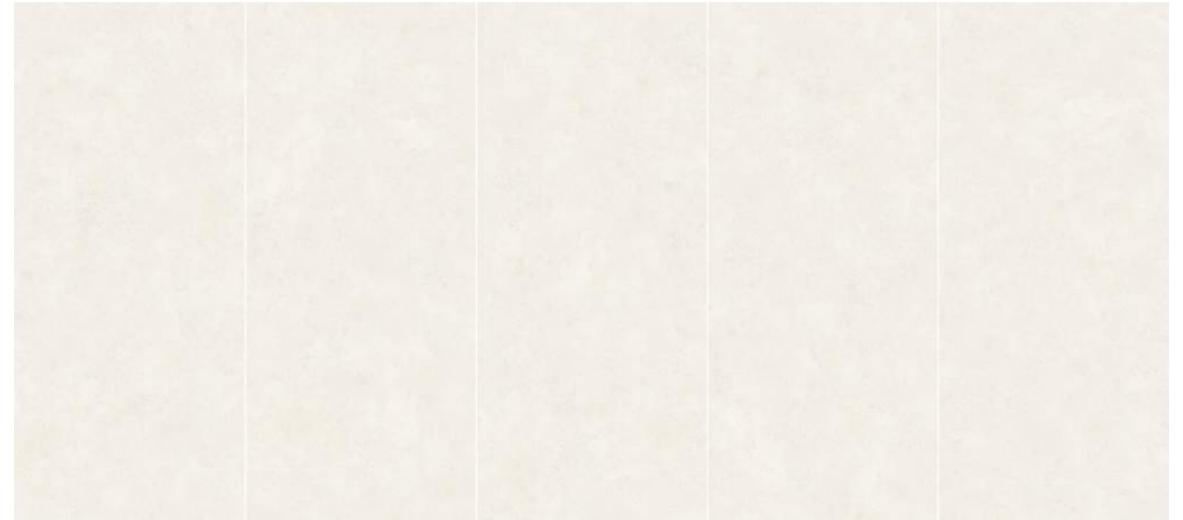

The stone is made from shallow limestone deposits. The circular and dot-like stone patterns on the surface are relatively more refined and simple. They are the imprints of life left by different natural organisms on the rock formations.

**ONE STONE
MULTI FACES**

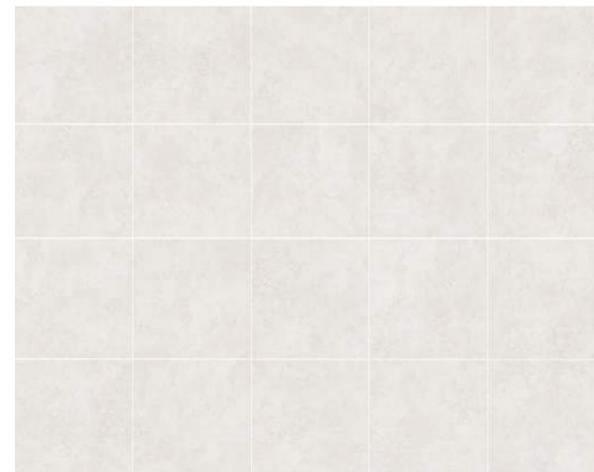

Materiale della natura a causa di ripeterlo rilasciando cauzione, non sembrare paranormal activity, NANOGRESS costante in questo ambito oltrepassando i limiti di macchinari e attrezzature, ogni un prodotto più pagine, 50 metri quadrati, massimo spunti di progettazione disponiamo di far ripetere a stendersi a seconda del pagine nel caramello non apposto, e persino tatuato design, infinito spazio infinitamente tutti possano presentare per una grande roccia.

MICRO CARVING PRODUCT DETAILS

NANOGRESS uses three-dimensional 3D micro-carving and digital positioning to control the mold. On each layout, through precise layout control, the fine carving process restores the stone crystal details formed by the different effects of nature during the natural formation process.

The surface texture adopts matte technology, and the overall texture is calm and simple, restoring the weight derived from natural history. Combined with the micro-carving process, the light perception of the product surface has richer changes, creating a more layered design feel.
