# CODOMO

Costa Rock Collection

The main lines of COMODO are the traces of waves crashing into and infiltrating the rocks, adorned with the remains of white shellfish. COMODO, generally speaking, is more of the light and moist rock texture, with five kinds of color close to sand, which shows a delight of life with both enthusiasm and leisure.

TARDIVO is inspired by EL CAPITAN. After hundreds of thousands of years, it is still as solemn as poetry. Like a thinking giant, it quietly witnessed the turbulent vicissitudes in the world. What always remains unchanged is its tolerance and indifference that after all the years, accommodates everything in the mountains and rivers. Ancestral cliffs, with distinct lines, mountains, waters show their figures one by one in TARDIVO, indifferently and rather calmly, meanwhile, it also contains a torrent of surging.
