PURE COLOR

To Be Simplified & Extraordinary

Returning to the most primitive and concrete form, its design is minimalistic rather than simple. Element , with its natural color as its origin, tries to restore the original appearance of a happy life with a pure color, which is spotless, pure and clear, giving people a sense of quiet comfort and infinite space-time thinking.

WOOD

Back To Nature Like It Never Leaves Us

Wood lays its root at home. It witnesses the profundity & warmth of home. Element travels around the world just to find that historical growth of nature capture the vivacity & warmth within and recreate it into a ceramic surface concealing the soul of oak.

CEMENT

Renewed Esthetics For Simplicity

Featuring a simplistic calm of fair-faced concrete, Cement has more artistic gloss and vein enabled by fantastic techniques processing. The detail-focused simplicity renders the space refreshingly elegant and brings out a sense of distinctive vivacity in unadorned style, which will sustain overtime.

TERRAZZO

Restyle Classics Into Modern Art

Instead of complicated design and dynamic color palette, Element sustains the essence of Terrazzo by recreating the granular finish with special techniques to bring new classics and more power to the space.

Cleaning And Maintenance

Special Cleaning Or Deep Cleaning

Clean the floor with a rough cloth soaked in lukewarm water and basic detergent for organic dirt (grease, oil, foods) and acid detergent for inorganic dirt, cement and iron scale. At the end of this process, rinse the floor with clean lukewarm water.

Detergents

You may use any detergent available on the market, at the prescribed concentration, with the exception of hydrofluoric (HF) acid or its compound. However, it is always advisable to test the resistance of the material on a small area first, in order to avoid alterations to the floor surface.

Grouting And Final Cleaning

Grouting And Final Cleaning

When using normal drying adhesive, grout the floor after 24-48 hours, when using rapid drying adhesives, grout after 4 hours. When working with polished materials in particular, use cement grouts of a matching tone, avoiding dark color grouts with oxide materials, and vice versa.

When grouting these surfaces, it is advisable not to use flexible mortars made from synthetic materials (Flexughe), especially if the color contrasts that of the material, and not to use additives/latex. In fact, these products make it extremely difficult to remove any residue using normal cleaning products. If using grouts with contrasting or special pigments, take care to follow the information provided in the specifications and test the grout on the material before hand.

Use a rubber-coated spatula to apply the grout over the entire surface of the material.

Grout small areas at a time, removing excess grout with damp sponges or clothes (using clean water only) or specific equipment for removing excess grout, while the layer of grout is still damp.

Adequate initial cleaning is fundamental to get the best shining and to ensure cleanability and easy everyday maintenance. Initial cleaning should therefore be performed immediately after laying, using acid-based products, scrubbing hard and rinsing with plenty of water. This will make it possible to remove any grout, adhesive and cement residue, etc. You may use any detergent available on the market, with the sole exception of products containing hydrofluoric acid (compounds and derivatives) as provided for by standard EN 14411.

We recommend protecting the laid flooring carefully. When carrying out other operations such as painting, plumbing or other work, we recommend covering the floor with PVC sheets, airballs or fabrics once it has been laid.

APPLICATIONS

	 Indoor commercial settings with heavy foot traffic	 Indoor commercial settings with light foot traffic	 Residential settings	 Indoor wall coverings	 Outdoor floor settings	 Countertops

TECHNICAL ADVANTAGES

Impervious to stains and acids

It does not give off any harmful substances and is totally suitable for contact with food. NSF Certified.

Heat resistant

It does not burn in contact with fire nor does it emit smoke or toxic substances when subjected to high temperatures.

Non-absorbent

Waterproof and resistant to liquids, with an absorption level of almost zero.

Resistant, compact surfaces

Its hard surface makes it resistant to scratches and abrasion.

Easy to clean

Resistant to any kind of chemical cleaning agent such as bleach or ammonia.

Recyclable

Up to 52% of recycled content in every slab. 100% recyclable.

100% natural

It does not give off any substances that are harmful to the environment.

Lightweight

only 7kg/m² in the 3mm slab, 13.8kg/m² in the 6mm slab.

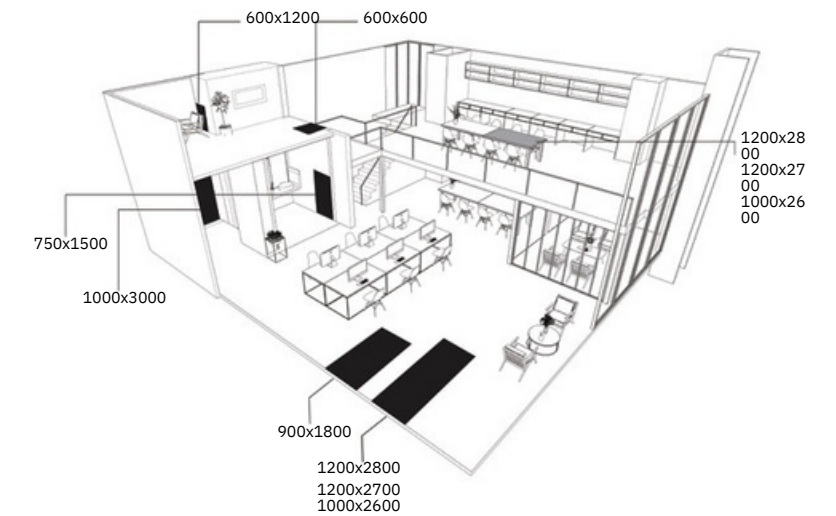

Colour-stable

Being 100% natural, its colors do not fade away when being exposed to sun light or other extreme weather conditions.

INFINITE DESIGN POSSIBILITIES

Specific solutions for various applications
